COURSE INFORMATION

Critical Incident Stress Management (CISM): Individual Crisis Intervention and Peer Support

Crisis intervention is NOT psychotherapy, rather it is a specialized acute emergency mental health intervention which requires specialized training. As physical first-aid is to surgery, crisis intervention is to psychotherapy. Thus, crisis intervention is sometimes called "emotional first-aid". Crisis interventions are typically done individually (one-on-one) or in groups. This program is designed to teach participants the fundamentals of, and a specific protocol for, individual intervention. The audience for this class includes both emergency services, military, medical, and business/industrial peer support personnel without formal training in mental health, as well as mental health professionals, who desire to increase their knowledge of individual (one-on-one) crisis intervention techniques. Please note that this is a two day class. Both days are required for credit. The topics listed below will be covered over the course of two days.

- The concept of CISM as a comprehensive crisis intervention program
- The role of the individual crisis intervention in the comprehensive CISM program
- Terms and concepts relevant to the study of crisis, traumatic stress and crisis intervention
- Differential utilities of selected crisis communication techniques
- Demonstration of selected crisis communication techniques
- Psychological reactions to crisis and trauma
- SAFER protocol for individual crisis intervention and it's role in comprehensive CISM
- Demonstration of the use of SAFER protocol for individual crisis intervention
- Review of common problems encountered while working with individuals in crisis

COURSE INFORMATION

Group Crisis Intervention (formally known as BASIC)

The Group Crisis Intervention training program is designed to present the core elements of a comprehensive, systematic and multicomponent crisis intervention curriculum. This two day course prepares participants to understand a wide range of crisis intervention services including pre and post incident crisis education, significant other support services, on-scene support services, crisis intervention for individuals, demobilizations after large scale traumatic incidents, small group defusings and the group intervention known as Critical Incident Stress Debriefing (CISD). The Group Crisis Intervention course specifically prepares participants to provide several of these interventions - specifically demobilizations, defusings and the CISD. The need for appropriate follow up services and referrals when necessary is also described. Considerable evidence gathered to date strongly supports the multicomponent crisis intervention strategy, which is discussed in this course.

The Group Crisis Intervention course also teaches crisis intervention and Emergency Mental Health skills such as demobilizations, defusing and CISD. At the completion of this course, participants will be able to: Define stress, CIS, and PTSD. List the 10 basic interventions of CISM; Define and describe in detail the CISM group processes of Demobilization, Defusings and Debriefings.

Completion of Group Crisis Intervention and receipt of a certificate indicating full attendance qualifies as a CORE class in ICISF's Certificate of Specialized Training Program.

Group Crisis Intervention - K.C. Schuler, Instructor

- General, cumulative, critical incident stress and PTS
- High risk populations - emergency services, military, other
- 'Critical Incidents' - death, injury, threat, terror, etc.
- Critical Incident Stress Management (CISM) fundamentals
- Core intervention tactics
- Demobilization
- Defusing of small groups
- Defusing Demonstration
- Essentials of group intervention, Critical Incident Stress Debriefing
- Assessing the need for CISD
- Factors which enhance CISD success
- Question/Answer
